

Protein Bar Processing Machine

Foodsure is a food processing machine company which manufactures different types of food processing machine like Mayonnaise, Tomato ketchup, Makhana roasting, Canning retort which is efficient and reliable to use and fully fulfill the actual needs of their customer. Whole machine of foodsure is made from SS 304 Material which fulfilled food compliance as well as safety compliance of industry it will help client to make their product as a brand in their segment and make them different from their existing competitor and get reach to their client easily as well as export their product in other country as well.

Why Choose the foodsure ?

Expertise: With years of experience in the food processing industry, Foodsure has the knowledge and skill to deliver superior solutions. Our experience ensures that the machines we offer are tailored to meet industry standards.

Customization: We offer customizable machinery to meet specific production requirements and challenges. We tailor our machines to match the specific requirements of your food processing operations.

Support: Our dedicated customer support team provides comprehensive services, including installation, training, and maintenance. Foodsure is committed to providing excellent customer support.

Global Reach: Foodsure serves clients worldwide, ensuring access to our innovative products and services wherever you are located. We provide the best quality & Turnkey Solution.

Protein Bar Processing Machine

The FoodSure Protein Bar Making Machine is an advanced, automated solution designed to streamline the production of protein bars. Engineered with precision and efficiency, this machine ensures consistent quality and output. Ideal for small to large-scale production facilities, it integrates seamlessly into your manufacturing process, offering robust performance and reliability.

Process Flow Chart

PROCESSING MACHINES

Protein Bar Roasting Machine-

Protein Bar roasting machine is a specialized appliance designed for evenly roasting dry fruits. It operates by using precise temperature control to ensure consistent roasting without burning. These machines come in various sizes, from small counter top models for home use to larger industrial units for commercial production.

Dry Fruit Grinding Machine-

Dry Fruit Grinding Machine is an essential piece of equipment designed for grinding various types of dry fruits into fine or coarse powder. This machine is widely used in food processing industries to prepare ingredients for snacks, health bars, desserts, and other culinary applications.

Main Mixing Tank with High

Shear Mixer-The Foodsure Main Mixing Tank with High Shear Mixer and Agitator, crafted from high-quality stainless steel (SS 304), is a specialized machine designed for the efficient production of protein bar.

Sugar Syrup Preparation-The

Sugar Syrup and Chocolate Preparation Machine for Bar Production is specifically designed to cater to the needs of bar manufacturers, such as those producing protein bars, granola bars, and chocolate bars.

Extruder Machine-

This machine is designed to extrude, form, and cut protein bars with precision, ensuring consistency in size, shape, and quality.

Cooling Tunnel- This tunnel ensures that freshly extruded bars maintain their desired shape, texture, and quality by cooling them uniformly.

Packaging Machine-The

Foodsure Auger Filler Packaging Machine with SS 304 construction is an advanced and efficient solution for accurately dosing, filling, and packaging a variety of dry and powdered products in the food industry.

Ink Jet Printing machine-The

4-Line Inkjet Printing Machine is a versatile industrial printer designed for high-speed, four-line coding on various surfaces.

Upgrade your production with our advanced Protein Bar machines for efficient processing and superior quality outputs.
