FULLY AUTOMATIC MACHINES

SI No.	Description	Capacity Per Hour	Power Load KW	Area Required sq feet For Full Plant Operation approx.	Size of the Machine L x W (Feet) approx.	MOC SS 202/SS 304
1	Eggless Mayonnaise/ Egg Mayonnaise	80-100 kg	23	1500	10 x 8	SS 304
2	Eggless Mayonnaise/ Egg Mayonnaise	200 kg	38	2500	15 x 8	SS 304
3	Eggless Mayonnaise/ Egg Mayonnaise	300 kg	42	3500	20 x 8	SS 304
4	Eggless Mayonnaise/ Egg Mayonnaise	500 kg	55	4000	30 x 8	SS 304
5	Eggless Mayonnaise/ Egg Mayonnaise	1000 kg	110	6500	50 x 10	SS 304
6	Eggless Mayonnaise/ Egg Mayonnaise	2000 kg	150	10000	80 x 10	SS 304

SEMI-AUTOMATIC MACHINES

SI No.	Description	Capacity Per Hour	Power Load KW	Area Required sq feet For Full Plant Operation approx.	Size of the Machine L x W (Feet) approx.	MOC SS 202/SS 304
1	Eggless Mayonnaise/ Egg Mayonnaise	80-100 kg	18	1000	10 x 8	SS 304
2	Eggless Mayonnaise/ Egg Mayonnaise	200 kg	33	2000	15 x 8	SS 304
3	Eggless Mayonnaise/ Egg Mayonnaise	300 kg	37	3000	20 x 8	SS 304
4	Eggless Mayonnaise/ Egg Mayonnaise	500 kg	50	3500	30 x 8	SS 304
5	Eggless Mayonnaise/ Egg Mayonnaise	1000 kg	105	6000	50 x 10	SS 304
6	Eggless Mayonnaise/ Egg Mayonnaise	2000 kg	145	9500	80 x 10	SS 304

Achieve consistency and quality with our advanced mayonnaise processing machines.

PROCESSING MACHINES

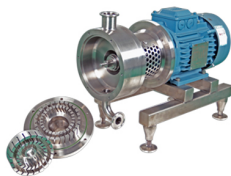

Cooking Kettle-The SS 304 Cooking Kettle is a steam-operated machine crafted from stainless steel. This durable kettle is designed for cooking various food products. With precise temperature control and steam operation.

Main Mixing Tank with High Shear Mixer-The Foodsure Main Mixing Tank with High Shear Mixer and Agitator, crafted from high-quality stainless steel (SS 304), is a specialized machine designed for the efficient production of mayonnaise.

Transfer Pumps-SS 304 Transfer Pumps for Mayonnaise efficiently handle mayonnaise transfer. Constructed from stainless steel, these pumps ensure durability and compliance with food safety standards.

Homogenizer-The Foodsure Inline Homogenizer 5 Stage Machine is an advanced processing equipment designed for efficient homogenization emulsification, and particle size reduction in various industries

Holding Storage Tank-The SS 304 Holding Storage Tank for Final Mayonnaise is a stainless steel vessel designed to store and maintain the quality of the final product. Durable and compliant with food safety standards.

Plate Heat Exchanger Chiller-The Foodsure Plate Heat Exchanger (PHE) Chiller for Water is an efficient and compact machine designed to cool water using a plate heat exchanger system. This equipment is commonly used in industrial and commercial.

Pneumatic Filler-The Pneumatic Filler for Mayonnaise is an efficient machine utilizing pneumatic technology for filling containers with precision. Ideal for Mayonnaise production, it ensures accurate and controlled filling, contributing to the seamless packaging process in the food industry.

Automatic Packaging Machine-Automatic Mayonnaise Packaging Machine is a cutting-edge solution designed to streamline the packaging process for mayonnaise and other similar condiments. This machine combines advanced technology, precision engineering, and user friendly features to ensure efficient, hygienic, and consistent packaging of mayonnaise in various container formats.

Band Sealer Machine-Band Sealer Machine is a high performance packaging solution designed for sealing bags and pouches quickly and efficiently. Ideal for a variety of industries including food, pharmaceuticals, and retail, this machine ensures a secure and consistent seal, enhancing the shelf life and quality of your products.

Packaging Type

01

Pet Jars

02

Center Seal Pouches

03

Side Spout Pouches

04

Center Spout Pouches

05

Squeezy Bottle

06

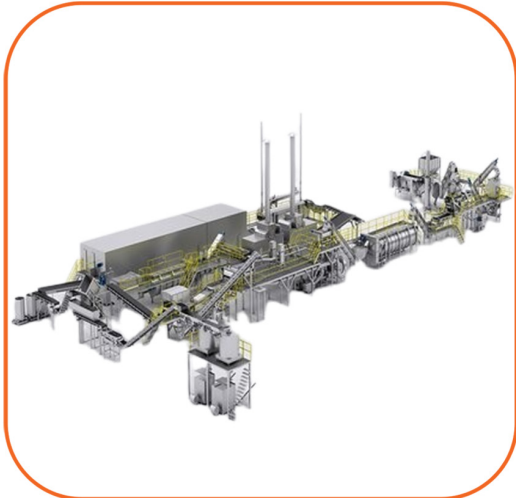

30 g Small Pouches

**Tomato Ketchup & Sauce
Processing Plant**

**Sweet Corn Canning
Processing Plant**

**Mushroom & Vegetable
Canning Processing Plant**

**Protein Bar
Processing Plant**

**Beverage
Processing Plant**

**Ginger & Garlic Paste
Processing Plant**
